

Business Luncheon

Mid Year Business Review 2011

Special sponsors:

Despite some macroeconomic turbulences in the first half of 2011, Vietnam's economic outlook is still upbeat in comparison to other regions, with analysts forecasting annual GDP growth to be an average 6.5% for 2011 - 2012 and to accelerate to an average of more than 7% from 2013-2015. After an exciting first half of 2011, it is now time to review what is the current situation in the banking, real estate and capital markets sector, and what is to be expected for the rest of the year.
